

Availability of County-Level Data for Kentucky from the American Community Survey

Julie N. Zimmerman. Professor, Rural Sociology. January 2022.

Two types of estimates are released each year from the American Community Survey: 1- and 5-year estimates. Which estimates are available depends on the size of the county's population. The 5-year estimates are the only estimates that are available for all geographies.

Copies of this handout and others are available online at: <http://kybtn.ca.uky.edu/>. Just click on "Publications."

County	1-Year estimates	5-Year estimates
